

INSTRUCTIONS - HOLDON® MIDI

IMPORTANT – In the interest of maximum safety and security, the Easyclip Midi is designed to have exceptional gripping power; Easyclip's grip increases as the load applied increases. To ease the dismounting of the clip after heavy loading, please follow the instructions below.

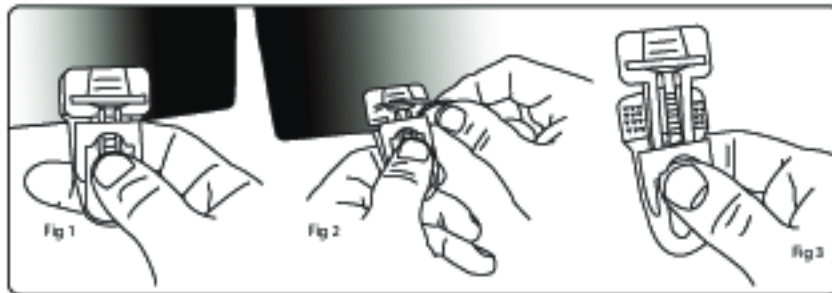

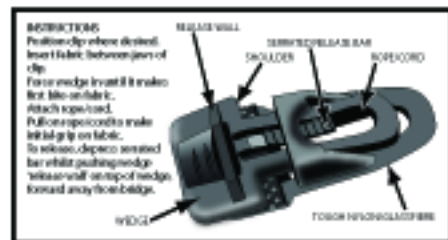

Fig 1 - Press thumb on centre release bar until you feel it flex (as illustrated) – this will unlock the wedge to enable it to move forward.

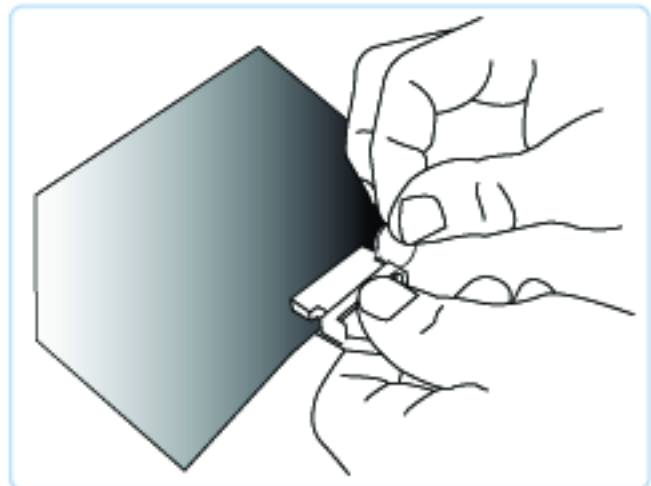

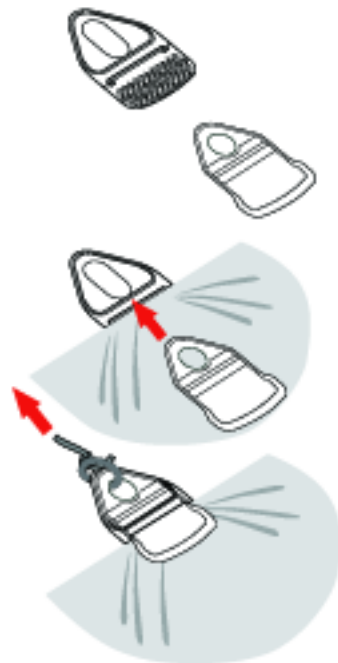

Fig 2 - Whilst still pressing the release bar, insert a coin between the bridge and the shoulder of the wedge as illustrated, and then twist the coin – this will lever the wedge forward to release the grip.

Fig 3 - Whilst still pressing the release bar, slide the wedge fully forwards as illustrated and remove from fabric.

INSTRUCTIONS - HOLDON® MINI

IMPORTANT – In the interest of maximum safety and security, the Holder® Mini clip is designed to have exceptional gripping power; Holder® Mini clip grip increases as the load applied increases. To ease the dismounting of the clip after heavy loading, please follow the instructions below.

- 1) Grip the Holder® Mini clip firmly, as illustrated
- 2) Insert coin between the bridge and the shoulder of the wedge
- 3) Twist the coin and at the same time use thumb to push the wedge forward - moving the wedge forwards releases the grip
- 4) The Holder® Mini clip will now be loose and free to remove from the fabric
- 5) The clip can now be repositioned or reused
