WHOLESALE ONLY - FAMILY OWNED SINCE 1999 - 100% SATISFACTION GUARANTEED!

## Scaffold Mesh

Scaffold Mesh is a specific type of shade cloth used mainly in the building and construction industry. Its main purpose is to cut down visibility from the outside of the job site as well as assist in preventing dust and rubble from leaving the work site.

Scaffold Mesh has button-hole eyelets along the top and bottom edges for easy fixing.
